[LeetCode](#) | [LinkedIn](#) | [GitHub](#)

Full Stack & AI Developer skilled in building intelligent web applications using FastAPI, React, and MongoDB. Experienced in Agentic AI and Generative AI with strong focus on real-world problem solving. Passionate about creating scalable systems powered by modern cloud technologies.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, SQL, HTML/CSS, TypeScript

Frameworks: FastAPI, ReactJS, ExpressJS, NodeJS, TailwindCSS, NextJS

Cloud/DevOps: AWS (EC2), Docker, Git

Databases: MongoDB, MySQL

Soft Skills: Team Management, Time and Resource Management, Adaptability

EDUCATION

Bachelor of Technology - Computer Science and Engineering | Nov 2023 - May 2027

Keshav Memorial Institute of Technology | CGPA: 8.8

Intermediate - PCM | May 2021 - Aug 2023

Narayana Junior College, Hyderabad | 93%

PROJECTS

Chat-APP | React.js, MongoDB, TailwindCSS, Sockets, AWS(EC2), RESTful API

- Developed a full-stack real-time chat application using React, Node.js, Express, and MongoDB, enabling instant messaging with persistent chat history and JWT-based authentication
- Integrated WebSocket-based communication for low-latency real-time messaging and WebRTC for peer-to-peer audio/video communication
- Deployed the application on AWS EC2, configuring the server for production and ensuring reliable availability

AvatarAI | FastAPI, Next.js, MongoDB, TailwindCSS, AniTalker, Zonos

- Developed an AI-powered talking head generation system that creates realistic avatar videos from a single input image, text, and voice
- Integrated AniTalker for facial animation and lip-sync generation and Zonos for voice-driven motion synthesis
- Designed REST APIs for handling image, text, and audio inputs and orchestrated AI inference workflows

IMAS | Next.js, FastAPI, TypeScript, Agentic AI, Docker, GitHub Actions

- Implemented a multi-stage AI workflow with complexity analysis (Low/Medium/High) to route cases dynamically to appropriate AI agents or expert recommendations
- Built AI agent coordination for medium-complexity cases and expert doctor recommendation logic for high-risk scenarios with simplification and reporting agent for clear medical reports
- Secured the platform with Clerk authentication, containerized services using Docker, and automated CI/CD using GitHub Actions

CERTIFICATIONS & ACHIEVEMENTS

Participated in **CodeNovate 2.0** and developed **PlanAI**, an application that converts simple building architecture ideas into interactive 3D models
